

```

class employee extends person {
    private int salary;
    public employee (String name, String
address, int salary) {
        super(name, address);
        this.salary = salary;
    }
}

```

```

    @Override
    public void display () {
        System.out.println("employee");
        System.out.println("name: " + getName());
        System.out.println("address: " + getAddress());
        System.out.println("salary: " + salary);
    }
}

```

```

class Customer extends person {
    private int balance;
    public customer (String name, String address,
int balance) {
        super(name, address);
        this.balance = balance;
    }
}

```
